Date: 1st September 2016

Subject: New SABIC Supplier Due Diligence Programme

Dear Valued SABIC Supplier,

We would like to inform you about the new SABIC Supplier Due Diligence Programme ("the Programme"), the next step in SABIC’s Supply Chain Management. The Programme will deliver the supplier intelligence we need to advance responsible sourcing practices across our business, ensure a compliant supply chain and make sure we continue to invest in the right suppliers to support our growth globally.

Today, we are operating in an ever-changing and interconnected business environment where both SABIC and its stakeholders have an overriding interest in confirming that our products are made in a safe, ethical, and environmentally responsible manner. To ensure the sustainability of our supply chain, SABIC has collaborated with Achilles, one of the world’s largest service providers of global supply chain management solutions.

Starting in September 2016, each of our current and prospective suppliers will be required to register in a new, on-line due diligence portal hosted by Achilles. The data collected through the Programme will serve as SABIC’s main source of up-to-date intelligence about the sustainability of our supply chain.

Your registration is important to SABIC as it will create a single point of entry to standardize supplier data across our company and will allow you to continue to participate in important business opportunities.

We are going to implement the Programme in a phased approach. On a rolling basis, each of our current suppliers will be invited to register. Achilles will support you through this process.

If you have any questions, please contact your SABIC buyer or sabic@achilles.com immediately to seek clarification to avoid any delays in completing your registration.

Promoting transparency and compliance throughout the supply chain will be beneficial to both of our businesses. We look forward to working with you on this important initiative.

Sincerely,

Ahmed M. Al-Shangiti  
VP Global Procurement

Frank Claus  
GM Global Supply Chain Center of Excellence
